-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2010.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bosma *et al.*, hereinafter referenced as "Bosma" (United States Patent Number 6,443,972) in view of Greenhalgh (United States Patent Number 6,364,895).

Bosma discloses an implantable, retrievable filter comprising first and second ends (Figure 8, unlabeled) which define a longitudinal axis, a plurality of struts (defining passages 25) extending between the first and second ends defining first and second filter sections (first and second sections surround center section, labeled by ref. 24) and a center section connecting the filter sections (24). While Bosma fails to disclose the second filter section defining a greater number of filter cells than the first section, Greenhalgh discloses a vascular filter which has a second filter section with a greater number of filter cells than a first section (see Figure 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the higher-density filtering in the second section, as disclosed by Greenhalgh, in the device of Bosma in order to provide a greater filtering efficiency, allowing particles to flow into the

filter through the first portion but retaining those particles in the denser second portion (see Abstract).

Regarding claim 2, the arrow in Figure 1 of Greenhalgh indicating the direction of blood flow shows that the first section is upstream of the second.

Regarding claim 3, the filter is formed from a single unitary metal element (col. 5, lines 42-65, Figure 6 shows single unitary metal element 19)

Regarding claim 4, the filter is usable in the vena cava.

Regarding claim 5, Figure 8 discloses anchors formed on at least one surface of the filter, and figures 9A-9C show a closer view of various embodiments of such anchors.

Regarding claim 6, the central portions of the struts extend parallel to the longitudinal axis (see Figure 8).

Regarding claim 7, Bosma discloses the filter being made of nitinol (col. 4, lines 11-14).

Response to Arguments

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3734

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
